

Forest #3.5

Date

2005

Primary Maker

Claude Zervas

Medium

Digital projection: single channel computer algorithm, 4-minute cycle, continuous digital photograph, Java program, computer, and projector

Description

This piece is a computer program that is then projected. It is one image that pixilates and then re-pixilates into focus. It is an image

of a forest that dissolves into an image that looks like a stained glass window. The algorithm is random and never creates the same image twice.

Dimensions

Video Running Time: 4 minutes (240 seconds)
